GLOBAL
PARTNERSHIPS
FOR A SUSTAINABLE
FOOD FUTURE

From
India
to a Food Secure
World

INDIA IS THE LARGEST AGRIFOOD MARKET OF THE WORLD.

16th & 17th
December, 2026

Hotel Leela Ambience,
Gurgaon, Delhi NCR

4th Indo Agri Future Food International is a premier global event focused on the evolving landscape of agri-food. The event brings together key stakeholders from across the value chain to explore new opportunities, innovations and partnerships in Grains, Pulses, Spices, Oilseeds, Edible Oil, Rice, Dryfruits, Food, Beverages and Machinery & Technology.

The event will take place on 16th & 17th December, 2026 at Hotel Leela Ambience, Gurgaon, Delhi NCR, India. The objective of this international trade show is to rethink the future of agri-food amidst global challenges, explore

new research, innovations, trade and technologies that can help build a nature-positive agri-food system, and forge partnerships and collaborations which will mobilize trade, networking, finance for innovation, research and business to promote food and nutrition security in the region and beyond.

The event will be attended by Policy Makers, Leading Traders, Processors, Exporters, Retail Investors, Corporate Groups, Commodity Exchanges, Logistics Companies, Machinery Manufacturers & Industrial Users, Boards, Associations, Government Bodies and other key stakeholders from Asia, Africa, Americas, Europe and Australia.

4th Indo Agri Future Food International 2026 offers a unique platform to connect globally for business networking, explore new markets, build partnerships, attend knowledge sessions on industry outlook, demand & supply and find new business opportunities in the global agri-food trade.

WHEAT

THE GRAIN THAT FEEDS NATIONS

India ranks 2nd globally in wheat production, with an estimated production of **113.3 million metric tons in 2025–26**, after China (139.5 million metric tons). Wheat is one of the most widely consumed cereals in the world and a key staple food for billions of people, providing around 20% of global calories and 19% of protein intake.

Wheat is a major crop across Asia, Africa and many other regions. It is used in a wide range of products such as whole wheat flour, refined flour (maida), semolina, bran, wheat germ, wheat grits, pasta, noodles, bakery goods, biscuits and animal feed. It is also an important raw material for bioethanol, food additives and pharmaceutical applications.

The global wheat market was valued at **USD 223.8 billion** in 2024 and is projected to reach **USD 294.5 billion by 2030**, growing at a **CAGR of 4.7%** (2024–2030). In terms of volume, global wheat production is estimated at 805.5 million metric tons in 2025, following corn and rice.

BASMATI RICE

A GLOBAL FAVOURITE FROM INDIA

Indian Basmati rice is a unique long-grain aromatic rice, known for its distinct aroma, soft and fluffy texture, superior taste and traditional heritage. India is the world's largest exporter of Basmati rice, with exports reaching a record **USD 5.8 billion** in 2024–25, accounting for over 70% of global Basmati trade.

The India Basmati rice market is estimated at **INR 560.8 billion (USD 6.7 billion) in 2025** and is projected to reach **INR 842.1 billion (USD 10.1 billion)** by 2030, growing at a **CAGR of 8.5%**.

Major export destinations include Saudi Arabia, Iran, Iraq, UAE, USA and key markets in Europe, Africa and Asia. India's Basmati rice is available in both parboiled and raw forms, and continues to gain popularity due to its premium quality, culinary versatility and strong global demand.

NON-BASMATI RICE

A STAPLE GRAIN FEEDING BILLIONS

Indian non-basmati rice continues to witness strong global demand due to its wide variety, competitive pricing and versatility. It caters to diverse culinary preferences across Asia, Africa, the Middle East and other key regions, making it a vital staple food commodity in international trade.

India's non-basmati rice exports reached **USD 17.8 billion in 2024–25**, with a total export volume of **22.3 million metric tons**, registering steady growth compared to the previous year. Major export destinations include Bangladesh, Nepal, Sri Lanka, African countries, the Middle East and Southeast Asia.

India's non-basmati rice production is estimated at **135.8 million metric tons in 2025–26**, accounting for the majority of the country's total rice output. India remains the world's largest exporter of rice, with non-basmati rice contributing significantly to global food security.

WAREHOUSING AND LOGISTICS

BUILDING EFFICIENT SUPPLY CHAINS FOR A STRONGER FOOD FUTURE

Warehousing plays a critical role in the agri-food value chain by ensuring the safe storage, quality preservation and efficient movement of food commodities. Modern warehouses, including Customised Warehousing Complexes (CWCs) and State Warehousing Corporations (SWCs), are built to scientific standards to protect the quantity and quality of stored products, reduce post-harvest losses and ensure year-round availability.

India's total warehousing capacity is estimated at **190 million metric tons in 2025**, with around **35%** managed by the private sector and the balance by government agencies, cooperatives and farmer groups. The sector is rapidly modernising with technology-driven solutions such as temperature-controlled storage, automation, real-time inventory management and integrated logistics services.

The global logistics market is projected to reach **USD 13.4 trillion by 2030**, growing at a CAGR of **6.8%** (2024–2030). In India, the warehousing and logistics market is expected to reach **USD 55.6 billion by 2030**, driven by the growth of e-commerce, agri-commodity trade, infrastructure development and increasing demand for efficient supply chain management.

OILSEED – SOYA / SUNFLOWER

Powering Nutrition | Supporting Sustainable Growth

India is the fourth largest oilseeds producer in the world. It has 20.8% of the total area under cultivation globally, accounting for around 10% of global production. The country produces Groundnut, Soybean, Sunflower, Sesamum, Niger seed, Mustard, and Safflower oilseeds.

During 2023–24, India’s exports of sesame seeds were valued at **USD 512.7 million**, while in April 2024–January 2025 the exports stood at **USD 489.2 million**. The export of Niger seeds between April 2024–January 2025 was valued at **USD 6.8 million**.

India exports oilseeds and derived products to more than 125 countries. Some of the top sesame-importing countries are Saudi Arabia, China, Japan, the USA, South Korea, Turkey, Indonesia, Israel, Vietnam, Iran, and Canada.

WHEAT

A GLOBAL GRAIN FOR A FOOD SECURE TOMORROW

India ranks 2nd globally in wheat production, with an estimated production of **115.4 million metric tons** in **2024–25**, as it is the mostly grown grain next to corn (global production is 1,230 million metric tons). China (138.0 million tons), India (115.4 million tons) and Russia (92.0 million tons) lead globally in wheat production.

Wheat is a staple crop in many Asian countries and other parts of the world. Wheat almost accounts for 20% of world’s calories. It provides nearly a similar proportion of dietary protein to almost 2.5 billion people in developing economies. Export destinations are Bangladesh, Nepal, Sri Lanka, and Southeast Asian countries.

Wheat milling business provides products such as whole wheat flour, all purpose flour, semolina, wheat bran, wheat germ, wheat grits etc. which are utilized in baking industries, animal feed industries, bioethanol production, food additives manufacturing, pharmaceutical/nutraceuticals and various other applications.

The global wheat market size was valued at **USD 231.5 billion** in 2024 and is expected to grow at a compound annual growth rate (CAGR) of **4.8%** from 2025 to 2030. In terms of volume, global wheat production is estimated at **806.9 million metric tons** in 2024–25, following corn and rice.

PIGEON PEAS

A NUTRITIOUS PULSE
FOR A HEALTHIER
TOMORROW

Pigeon pea (tur/arhar) is a vital pulse crop, widely grown in tropical and semi-arid regions. It is a key source of protein, dietary fibre and essential nutrients, making it an important part of food security and sustainable agriculture. Pigeon pea is used in a variety of food products including dals, soups, stews, curries and ready-to-eat meals. It also finds applications in animal feed, bioenergy, green manuring and soil conservation due to its nitrogen-fixing ability.

Global pigeon pea production is estimated at **6.8 million metric tons in 2024–25**. India is the largest producer, contributing around **90%** of global output, with a production of **6.1 million metric tons** in 2024–25 (Department of Agriculture & Farmers Welfare, Government of India).

The global pigeon pea market was valued at **USD 15.6 billion in 2024** and is projected to reach **USD 24.8 billion by 2030**, growing at a **CAGR of 7.0%** (2024–2030). Rising demand for plant-based proteins, increasing health consciousness and the crop's climate resilience are key growth drivers.

Apart from its nutritional value, pigeon pea supports farmer livelihoods through multiple harvests and strong domestic and international demand. Major export destinations for Indian pigeon peas include the UAE, Bangladesh, Sri Lanka, Nepal, the USA and African countries.

BANKING AND FINANCE

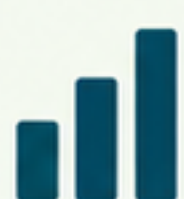

FINANCING
A STRONGER
AGRI-FOOD FUTURE

India's food and agri-food industry is witnessing strong growth, driven by rising domestic consumption, export opportunities, urbanization and supportive government initiatives. As of 2024, the Indian food processing sector is valued at **USD 535 billion**, contributing around **8.4%** to the country's manufacturing GVA and employing over **12 million people**.

The sector is expected to reach **USD 1,274 billion by 2027**, growing at a **CAGR of 14.9%** (2024–2027), supported by investments in infrastructure, technology and value addition.

India's banking sector continues to strengthen, with total bank credit reaching **INR 165.8 lakh crore (USD 1.99 trillion) in March 2025**, growing by **13.4%** year-on-year. Interest income of scheduled commercial banks (SCBs) increased to **INR 11.3 lakh crore in FY 2024–25**, reflecting healthy credit growth and strong demand across key sectors, including agriculture, food processing and MSMEs.

India's digital lending market is estimated to reach **USD 350 billion by 2030**, growing at a **CAGR of 22.4%** (2024–2030). With increased access to credit, innovative financing models and government support, the agri-food sector is well positioned for sustainable growth, driving food security, farmer prosperity and inclusive economic development.

SPICES

**RICH HERITAGE
BOLDER FLAVOURS
A HEALTHIER TOMORROW**

India is also known as the 'Land of Spices'. Out of 109 spices recognized by the International Organization for Standardization (ISO), more than 52-60 spice crops are grown in India. The major spices exported by India are turmeric, cumin, coriander, fenugreek, peppers, etc. Indian spices are gaining immense popularity and augmenting the demand for authentic Indian spices, such as cumin, coriander, turmeric, cardamom, and black pepper.

In 2024-25, India's spices exports reached a record **USD 4.46 billion (INR 37,414 crore)**, registering a growth of around **11.7%** compared to the previous year. The total spices production in India is estimated at **12.4 million metric tons in 2024-25**, making the country the largest producer, consumer and exporter of spices in the world.

The traditional markets, India's spices traders need to focus on innovation spice mixes to curate customized products for different geographies. Considering the growing demand for convenience, localized adaptation will help exporters establish a strong footing, especially in newer markets, and increase Indian spices exports.

Key spices like chilli peppers, pepper, cumin, coriander, and turmeric drive India's spice trade, with opportunities arising from growing demand for organic and specialty spices, expanding export markets, and government initiatives to promote spice exports and improve quality standards.

CHICKPEAS – DESI CHANA

**SMALL GRAINS
BIG POSSIBILITIES
A STRONGER TOMORROW**

India is the largest producer and consumer of chickpeas (also known as gram or chana) in the world. India produces over **12.1 million tons** of chickpeas in **2024-25**, accounting for around **28%** of global production. Most imports come from Australia, Canada, and Russia.

The global chickpea market size was valued at **USD 24.6 billion** in 2024 and is expected to reach **USD 36.4 billion by 2030**, growing at a **CAGR of 6.7%** (2024-2030). Rising demand for plant-based protein, healthy diets and versatile food applications is driving the market growth.

The chickpeas industry in India is valued at around **INR 75,000 crore** (approximately **USD 9 billion**). The government of India has implemented initiatives to increase chickpea production and productivity, such as the National Pulses Mission.

Other key factors that influence the demand, production, and consumption of chickpeas worldwide encompass aspects such as technological advancements in agriculture and market liberalisation. Technological innovations in farming techniques and equipment enhance chickpea cultivation efficiency, while market liberalisation policies facilitate smoother trade and investment flows in the chickpeas market.

FOOD PROCESSING MACHINERY & TECHNOLOGY

INNOVATION | EFFICIENCY | SAFETY | SUSTAINABILITY

ADVANCING FOOD. ENRICHING LIVES.

India's food processing industry is undergoing a rapid transformation, driven by rising demand for safe, nutritious and convenient foods, government support and adoption of advanced processing technologies. Modern food processing machinery and technology play a key role in reducing post-harvest losses, improving product quality, enhancing shelf life and meeting domestic and global demand.

MARKET OVERVIEW

The Indian food processing machinery market is witnessing strong growth, fueled by increasing investments in the food processing sector, automation, and demand for hygienic and high-quality food products.

The India food processing machinery market was valued at **USD 4.83 billion** in **2024** and is projected to reach **USD 7.90 billion** by **2030**, growing at a **CAGR of 8.6%** during 2024–2030.
